

DISCOVERING THE WORLD

with
Mr. Funwater!

It's fall in the small town of Aqua.

At the daycare, the children finish their gymnastics exercises, and each take their water bottle to hydrate.

However, Matheo refuses to touch his bottle: Since it's not summer, I don't need to drink water.

Myriam has an idea.

She calls Mr. Funwater!

**Mr.Funwater approaches Matheo and says:
You know how important it is to drink water after exercising?**

But Matheo is not convinced: There's no point in drinking water: It's only in the summer that it is useful.

Mr.Funwater has an idea: Kids, how about we go on a trip? Let's discover why drinking water is important at all times of the year.

Mr. Funwater invites Myriam and the children to hop onto his magic carpet. This carpet allows you to travel through space and time. Hold on tight and open your eyes wide.

“Wow!” respond all the children in unison.

IT IS IN ICELAND, IN THE MIDDLE OF WINTER,
THAT THE CARPET FIRST LEADS OUR GROUP.

During the winter, like here in Iceland, bodies
fight the cold and need water to keep their
temperature says Mr.Funwater.

Poof! Julie sees a lopi
sweater appear in her hands.
It is a traditional
Icelandic garment.

HEADING TO JAPAN, IT'S SPRING.

During the spring time, a period of rebirth as here in Japan, water is necessary for plants as well as animals and humans to allow bodies to activate.

And poof! A small porcelain cat appears in Jasmine's hands and a beautiful fan in Alphonse's.

THE CARPET NOW FLIES OVER MOROCCO, IT'S SUMMER.

During this season, and especially in arid areas like Morocco where water is rare, we try not to waste it. Water is vital to compensate for perspiration and to cool down.

Poof! Ludovic receives a teapot and Yara, a small tea glass.

LAST STOP OF THE TRIP, CANADA IN AUTUMN.

Mr. Funwater explains that during this season in Canada, as winter approaches, we can feel more tired. Drinking water can help us feel good and more awake. It is essential during activities, such as gymnastics.

And poof! Matheo receives a beautiful red maple leaf.

So children, did you enjoy this extraordinary trip?, asks Mr.Funwater.

All the children answer: yes! All together.

Each of the children proudly holds the object they brought back from the trip.

We will put the treasures on display to show them to your parents at the end of the day, suggests Myriam.

Outside, the golden leaves fly in the wind and Mr. Funwater returns to the sun. All the children toast to this beautiful day tchin tchin, then dance and sing the water glass song in chorus.

You too, sing and dance along with Mr. Funwater by watching the song on a phone.

The book *A Day at the daycare with Mr. FunWater* is an initiative of the *Mr. FunWater Challenge* as part of the *I'm Thirsty for Health!* Campaign. Developed by the Quebec Weight Coalition (Coalition Poids), an initiative of the Association pour la santé publique du Québec, the *I'm Thirsty for Health!* Campaign aims to promote healthy hydration by encouraging, normalizing, and valuing consumption of water. The campaign proposes simple actions to improve our living environments, to encourage the adoption of healthy hydration habits that will contribute to sustainable health for all.
